## TheraPedic™ Positioning Child Restraint System With NEW Tether

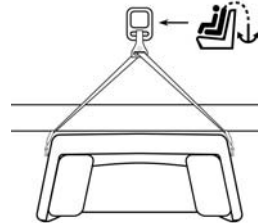

The Columbia Medical TheraPedic Positioning Child Restraint System is the leader in meeting the positioning requirements of special needs child restraints. To increase the ease of attaching this child restraint, Columbia Medical has developed a new tether system. The new tether now allows attachment to the upper anchor points for the LATCH system used on newer passenger vehicles. This makes it much easier for parents to attach and remove the child restraint. The new tether is 35% stronger than the version it replaces. Both models of the TheraPedic Positioning child restraint have been crash tested to meet Federal standards and ensure maximum safety.

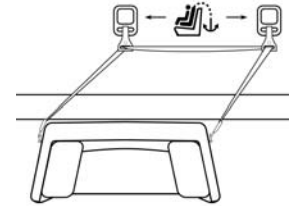

*Model 2500 and Model 2000*

*NEW tether design with compact tension adjuster hooks*

*Use a single hook for occupants under 80 lbs. (36 kg)*

*Use BOTH hooks for occupants over 80 lbs. (36 kg)*

### Features

- NEW tether design
- Compact tension adjuster hooks
- Dual hooks for LATCH anchors
- Adjustable reclining back and calf support
- Two child restraint sizes available
- Broad range of standard and optional positioning accessories
- Stroller compatible

### Benefits

- Easy to attach using the upper anchor points of the LATCH system . . . no need to drill and bolt in an anchor!
- Easy to use. Allows tether tension to be adjusted independently on either side of the child restraint
- Single hook attachment for occupants up to 80 lbs. (36.3 kg), use both hooks for occupants over 80 lbs. (36 kg)
- Accommodates occupant sizes from 20 lbs. to 130 lbs. (9.1 – 59.0 kg)
- Offers the maximum positioning to meet the requirements of special needs children
- Maximizes mobility; Model #2000 is even certified for use in aircraft
